

International Conference

Competitiveness of the economy in the context of social policy measures

22-24 June 2016, Hotel Windsor in Jachranka, Poland

The conference is organized in the framework of **Multiannual Research Program 2015–2019 “The Polish and the EU agricultures 2020+. Challenges, chances, threats, proposals”**.

The aim of this conference is to present research results and share experiences in research on social polarization and economic stability in the broadly understood food economy and the rural areas in the context of the applied measures of the social policy. The conference theme directs the conference to issues including:

- the regional and local development and the socio-economic cohesion in rural areas;
- the effectiveness of CAP instruments and other programmes of public intervention;
- the role of institutions in creation of human capital;
- the transformations in technical and socio-economic infrastructures of rural areas;
- the possibilities of development and improvement in competitiveness of agriculture and the food economy;
- the diversification of sources of livelihood of rural inhabitants;
- the building of innovative systems of knowledge and information in agriculture;
- the changes in labour resources in agriculture and the role of human capital in the socio-economic development of rural areas.

Conference organizer:

Institute of Agricultural and Food Economics - National Research Institute

Scientific Committee

Prof. Andrzej Kowalski (IAFE-NRI)

Prof. Alina Sikorska (IAFE-NRI)

Prof. Szczepan Figiel (IAFE-NRI)

Prof. Wojciech Józwiak (IAFE-NRI)

Prof. Jacek Kulawik (IAFE-NRI)

Prof. Józef Zegar (IAFE-NRI)

Prof. Włodzimierz Rembisz (IAFE-NRI)

Piotr Szajner, PhD (IAFE-NRI)

Marek Wigier, PhD (IAFE-NRI)

Organising Committee

Joanna Jaroszewska (IAFE-NRI)

Joanna Korczak (IAFE-NRI)

Krzysztof Kossakowski (IAFE-NRI)

Prof. Andrzej Kowalski (IAFE-NRI)

Małgorzata Mikołajczyk (IAFE-NRI)

Lech Parzuchowski (IAFE-NRI)

Ewa Sierakowska (IAFE-NRI)

Leszek Ślipski (IAFE-NRI)

Marek Wigier, PhD (IAFE-NRI)

Conference presentations

Dilemmas of the agricultural policy and the social policy

Prof. Andrzej Kowalski, Institute of Agricultural and Food Economics
National Research Institute (Poland)

The competitiveness of European agriculture in the context of globalization and integration

Dr Czesław Siekierski, Member of the European Parliament (Poland)

Changes in farm structures from a social aspect in the post-socialist EU Member States since their accession to the EU

Dr Norbert Potori, Research Institute of Agricultural Economics – AKI
(Hungary)

Small-scale farms: the social or economic problem

Prof. Wojciech Józwiak, Institute of Agricultural and Food Economics
National Research Institute (Poland)

Economic and social context of current social policy in the Czech Republic

Prof. Věra Majerová, Czech University of Life Sciences Prague (Czech Republic)

Policy and research needs on social and environmental farm performance

Dr Hans Vrolijk, LEI Wageningen UR (Netherlands)

The role of labour migration from rural areas over the sustainable agriculture development in the Republic of Moldova

Prof. Alexandru Stratan, dr Anatolie Ignat, National Institute for Economic Research (Republic of Moldova)

Social transformations in rural areas in Poland

Prof. Agnieszka Wrzochalska, Institute of Agricultural and Food Economics
National Research Institute (Poland)

Indicators and descriptors of sustainable agricultural education in Bulgaria

Prof. Nidal Shaban, University of Forestry Faculty of Agronomy (Republic of Bulgaria)

Changes in the quality of life in rural areas

Dr hab. Barbara Chmielewska, Institute of Agricultural and Food Economics
National Research Institute (Poland)

Productivity growth in EU agriculture: policy implications to Polish agriculture

Prof. Masahiko Gemma, Waseda University (Japan)

Dr Mariusz Hamulczuk, Institute of Agricultural and Food Economics
National Research Institute (Poland)

Evaluation of projects from the Rural Development Programme in CR

Ondřej Chaloupka, Dr Marie Pechrová, Prof. Thomáš Doucha, Institute of
Agricultural Economics and Information (Czech Republic)

LFA payments as the instrument of achieving both competitive and social
targets

Dr Justyna Góral, Institute of Agricultural and Food Economics National
Research Institute (Poland)

Bulgarian Programme for Rural Development (2007-2013): socio-economic
outcomes and lessons

Prof. Ivan Kanchev, Prof. Julia Doitchinova, University of National and
World Economy (Republic of Bulgaria)

Economic and social aspects of the Slovak agri-food sector

Ing. Mária Jamborová, Dr Slávka Krížová, Institute of Agricultural
and Food Economics (Slovak Republic)

Competitiveness in the agri-food trade in the new Member States –
a comparative analysis

Dr Camelia Gavrilesco, Romanian Academy – Institute of Agricultural
Economics (Romania)

Socio-economic conditions of improvement in labour productivity in the Polish
food industry in comparison to other EU countries

Dr Robert Mroczek, Institute of Agricultural and Food Economics National
Research Institute (Poland)

Issues on the applied economic mechanisms in Moldova's agri-food sector
management

Dr Ion Certan, Moldova State University (Republic of Moldova)

The Russian food embargo: impact on the national agri-food sector

Prof. Borys Frumkin, Russian Scientific Academy (Russia)

The assessment of territorial cohesion of the Polish municipalities in both social and economic terms

Prof. Marcin Gospodarowicz, Institute of Agricultural and Food Economics National Research Institute (Poland)

Analytic Network Processes as a tool in the development of the Thematic Networks for Business Innovative Models in Agriculture

Dr hab. Adriana Agapie, Bucharest University of Economic Studies (Romania)

Price relations, the rarity and the productivity land factor - socio-economic implications

Prof. Włodzimierz Rembisz, Dr Agnieszka Bezat-Jarzębowska, Institute of Agricultural and Food Economics National Research Institute (Poland)

Analysis of the Serbian competitiveness in terms of attracting investments into agriculture and rural tourism

Prof. Drago Cvijanović, Scientific Adviser, Faculty of Hotel Management and Tourism (Republic of Serbia)

Food security in Romania – determinants and vulnerabilities

Dr Monica Mihaela Tudor, Institute of Agricultural Economics (Romania)

Sustainable food consumption as a means of reduction of food wastage

Dr hab. Mariola Kwasek, Institute of Agricultural and Food Economics National Research Institute (Poland)

Economic assessment of the restriction on the use of neonicotinoids and the producers behavior of sunflower and maize in Bulgaria

Prof. Dimitre Nikolov, Institute of Agricultural Economics (Republic of Bulgaria)

The economic context of climate change impacts and evaluation of the impacts of the proposed adaptation measures in the South Moravian region

Dr Marie Trantinová, Institute of Agricultural Economics and Information (Czech Republic)

Integrated Water Management in the Republic of Bulgaria - status and priorities

Dr Teodora Stoeva, Agricultural University in Plovdiv (Republic of Bulgaria)

Prof. Andrzej Kowalski

*Chairman of the Conference
Institute of Agricultural and Food Economics
– National Research Institute*

Main activities:

Employment: 2000-present: Director of Institute of Agricultural and Food Economics; 1974-present: SGPiS/SGH Central School of Planning and Statistics/Warsaw School of Economics: Assistant, Lecturer, Associate Professor, Extraordinary Professor; 1987-1992: Dean's Plenipotentiary, Vice-Director of Institute of National Economy, Warsaw School of Economics; 1991-1993: Ministry of Agriculture and Food Economics, Adviser to the Minister; 1995-2008: Institute for Agricultural and Food Economics in Warsaw – Associate Professor; 2008-present: Professor; 1999-2008: Head of Agricultural Department Warsaw School of Economics; 1999-2000 Vice Chairman of Scientific Council, Institute of Agricultural and Food Economics, 2004-2006 – Deputy Minister of Agriculture and Rural Development, 2008-present: Professor, Collegium of Business Administration, Warsaw School of Economics, Lecturer; 2013-Advisor of The Commission of Agricultural and Rural Development of the Polish Sejm.

Membership: Scientific Council of Collegium of Business Administration, Warsaw School of Economy; Scientific Council of Polish Team of IIASA; Scientific Council of the Institute of Rural and Agricultural Development, Polish Academy of Sciences; Member of the Committee on Agricultural Economics, Polish Academy of Sciences; Foreign member of the Ukrainian Academy of Agrarian Sciences, received Honorary Doctorate degrees from the Agroecology Institute, the Ukrainian Academy of Agricultural Sciences.

Prof. Włodzimierz Rembisz

*Institute of Agricultural and Food Economics
– National Research Institute*

Main activities:

Scientific research and education: Up to 2007 at Warsaw School of Economics, since then at University of Finance and Management in Warsaw and in the Institute of Agricultural and Food Economics – National Research Institute. Non-research involvements: Government's Agency for Agricultural Markets; Private Agricultural Commodities Trade Company; Warsaw Board of Trade; Key Expert of the UE& UNDP Projects in many countries

Main scientific interest:

The main domain: Agricultural Economics, Microeconomics, Mathematical Economics. The main subjects : the mechanism and sources of factors productivity change; mechanism of agricultural market; the sources of labour factor remunerations; market and policy impacts on the farm producers choices; the economics of agricultural policy.

Institute of Agricultural and Food Economics

– National Research Institute

20 Świętokrzyska St., 00-002 Warsaw, Poland

phone: +48 225054495

e-mail: wrembisz@o2.pl rembisz@ierigz.waw.pl

Agnieszka Bezat-Jarzębowska, PhD

*Institute of Agricultural and Food Economics
– National Research Institute*

Main activities:

- Monographs containing work on analytical approaches related to agri-food sector, eg.: Introduction to analysis of investment, productivity, efficiency and technical change in agriculture; Agricultural policy and the decisions of agricultural producers about income and investment; Dynamic stochastic general equilibrium model as a tool supporting CAP foundations; Microeconomics of agricultural producers' income;
- Experience in leading of scientific projects, eg. within the framework of the project entitled The Polish and the EU agricultures 2020+. Challenges, chances, threats, proposals; the research task: investments, efficiency and new technologies as the sources of economic growth in agriculture until and after 2020;
- Research stays in U.S., Australia, Germany, Austria, and France;
- Experience in teaching courses covering quantitative methods in economics, microeconomics, econometrics.

Main scientific interest:

- Analytical approaches related to agri-food sector,
- Economic growth in agriculture,
- Efficiency assessment,
- Scientific questions of theoretical and methodological character.

About the Institute

The Institute of Agricultural and Food Economics – National Research Institute (IAFE-NRI) is a leading research centre in Poland in the field of sector-specific economic science. It was set up in 1983 by merging the Agricultural Economics Institute, which existed since 1950, and the Food Industry Economics and Organisation Institute, established in 1980. In October 2004, by virtue of a decision of the Council of Ministers, the Institute acquired the status of a national research institute, and since 1 January 2005 it has operated under the present name of the Institute of Agricultural and Food Economics – National Research Institute. The Institute represents an independent research centre supervised by the Minister of Agriculture and Rural Development.

The scientific research conducted at the IAFE-NRI is focussed on key issues in the field of economic, production and social situation of rural areas in Poland, agriculture, and broadly-understood food economy, including:

- the status and developmental prospects for food economy and its sectors,
- the conditions on the markets of basic agri-food products and means of production,
- the consequences of Poland's accession to the European Union for its agriculture, food industry and rural areas,
- the status of Polish food economy at the background of the EU,
- the competitiveness of the Polish food economy,
- the impact of globalisation processes on the development of agriculture and food industry,
- ownership and structural transformations in food economy and on rural areas,
- the regional development of rural areas,
- socio-demographic transformations of agricultural and rural populations,
- the subsistence level within society and the country's food security,
- the production and economic situation of agricultural holdings and companies operating in the food industry,
- the costs and profitability of producing basic agricultural goods.

The research is conducted under the Institute's statutory scientific activity, the Multi-Annual Programme, the FADN (Farm Accountancy Data Network) Liaison Agency, and national and international scientific and research projects. The results of scientific and research studies and expert evaluations produced by the Institute are used in formulating the country's policies on agriculture and rural areas. They serve as a source of data on the functioning of the whole food economy in the EU environment, while also allowing the current monitoring of integration processes among different economic systems. They also constitute a significant contribution to the theoretical development of agricultural economics and integration.

Multi-Annual Program 2015-2019

By virtue of the Resolution of the Council of Ministers of 10 February 2015, the next Multi-Annual Program entitled **“The Polish and the EU agricultures 2020+. Challenges, chances, threats, proposals”** will be implemented in the years 2015-2019 by IAFE-NRI. Being both horizontal and strategic in its assumptions, this program will allow us to define the transformation processes within the broadly understood agri-business as well as the advantages and threats connected with further development of agriculture and rural areas. It will constitute a source of rationale for supporting public policies in the decision-making process. The assumptions of the Program cover the strategic aims included in the EU policies and programs as well as the development strategies accepted by the Polish government.

The main aim of the Multi-Annual Program of 2015-2019 is to support governmental bodies, especially The Ministry of Agriculture and Rural Development in their monitoring of the socio-economic and organizational situation of the country as well as in planning, negotiating, analyzing, evaluating and implementing of the development policies concerning the Polish agriculture and rural areas. These actions should lead to growing competitiveness of the Polish agri-business until 2020 and beyond. The other aims of the research program are as follows: to define the general trends in the world economy, to define the sources of growth in agriculture, to examine the role of the agri-food sector, to assess chances and threats in development of farms and agricultural enterprises, to determine the mechanisms of overcoming the structural barriers to rural development, to examine the effects of innovations in the food economy, to define the position of farms and agricultural enterprises in meeting the challenges of climate change, to appraise the external effects and public goods in agriculture, to evaluate the efficiency and effectiveness of using financial transfers and the instruments of the CAP in structural transformation, establishing the competitive advantages and improvement of living and working conditions of rural inhabitants. The Multi-Annual Program **“The Polish and the EU agricultures 2020+. Challenges, chances, threats, proposals”** is divided into 8 topics and 27 research tasks which cover the main socio-economic issues related to agri-business and rural areas at regional, national, EU and global level. It is a continuation of the previous research and analyses conducted by the IAFE-NRI, including also new issues which reflect changing economic environment and the evolution of the CAP.

These include:

I. Impact of the general trends in the world economy on the development trends in the EU agriculture:

- quantitative changes in the world economy;
- knowledge-based economy – challenges to the Polish agri-food sector and its adjustments.

II. Social polarization versus economic stability in the development processes of agriculture and rural areas:

- forming of socio-economic cohesion at the local and regional level;
- mechanisms leading to overcoming structural barriers in the development of family farms and rural areas;
- defining the rural and agricultural policies in the conditions of transformation of the rural economy.

III. Factors determining the innovative activity in the agri-food sector:

- evaluation of the innovations in the Polish agri-food sector;
- organizational conditions of the innovations in the Polish agri-food sector;
- regional strategies to encourage innovations in agriculture, food industry and rural areas.

IV. Financial and fiscal factors in the improvement of efficiency, sustainability and competitiveness of the Polish agriculture:

- fiscal mechanisms and stimuli having their influence on the rural development, returnable financing and quasi-marketable instruments for internalization of external effects in agriculture, the provision of public goods;
- subsidies versus economics, finances and incomes of farms;
- taxes, quasi-taxes, transfers and social and farm insurance, instruments of risk management in ensuring competitiveness, financial stability and social security in agriculture and rural areas.

V. Dilemmas of the development of sustainable agriculture in Poland:

- global and national conditions of the sustainable development of agriculture;
- economic assessment of external effects and public goods in agriculture;
- sustainable agriculture and food security.

VI. Farms and agricultural enterprises in the face of climatic change and the changes in the agricultural policy:

- challenges of globalization versus competitiveness of farms and agricultural enterprises in Poland;

- economic effects of adjustments and mitigating actions on farms and in agricultural enterprises in different natural and organizational conditions;
- efficiency of farms and agricultural enterprises;
- analysis of changes in profitability of the selected agricultural products;
- obstacles to modernization of farms and agricultural enterprises in the country against their competitiveness.

VII. Development and the economic outlook for the agri-food markets:

- developments in the world markets and their consequences for the domestic agri-food market;
- evaluations of the current situation in the basic agri-food markets in Poland against the background of the EU markets;
- competitiveness of the Polish food producers and its determining factors;
- structural transformations of the food industry in Poland and in the EU in the changing market environment.

VIII. Sources of growth and the expected evolution of structures and the role of the agri-food sector until the year 2020 and beyond:

- investments, efficiency and new technologies as the sources of economic growth in agriculture until and after 2020;
- market structures and prices in the food chain in the light of margin levels, its transparency, competitiveness and regulations;
- functioning and the role of the agri-food sector within the national economy (the model approach);
- developing the methodology for evaluation and monitoring of changes in the index of result for RDP 2014-2020, which is measured by a relation of gross value added to the annual work unit (GVA/AWU).

The programme's results are addressed to administrative bodies and government agencies, voivodeship and marshal offices, agricultural advisory centres, agricultural chambers, farmers' and processors' industry organisations, academic and university circles, agricultural schools, as well as all entities interested in the analysed issues. The results are included in the analysis of the Programme available free of charge on www.ierigz.waw.pl and presented during the IAFE's conferences and seminars.

The publications of the IAFE-NRI

The results of research and scientific studies are presented primarily in the IAFE's own publications. They are prepared in printed and electronic form under the following publishing series:

Studies and Monographs – periodical publications comprising syntheses of completed research, monographs, and scientific studies.

Market Analyses – reports which are published once or twice a year. They present an analysis of the condition of and development forecasts for, the basic markets for agricultural and food products (milk, meat, cereals, potatoes, sugar, rape, fruit and vegetables, fish, poultry and eggs, fodder, tobacco and alcoholic beverages), the market for the means of production and services for agriculture, the market for land, foreign trade, and food demand.

Publikations of the Multiannual Programme 2015 – 2019 – the results of the work conducted within particular tasks in the programme “The Polish and the EU agricultures 2020+. Challenges, chances, threats, proposals”. The monographs are available free of charge on the website www.ierigz.waw.pl/publikacje.

Press Reports Expertise – periodical publications containing initial research findings.

The Agricultural Market – a monthly publication presenting the current monitoring of the situation in the basic agricultural markets for cereals, sugar, rape, potatoes, fruit and vegetables, milk, meat (beef, pork, and mutton), poultry and eggs, fish, food product market as a whole, and the market for the means of agricultural production and services. The bulletin is available free of charge on the website www.ierigz.waw.pl/publikacje.

The economic results of selected agricultural products – yearly publications presenting the volume of production and costs in, and income from selected agricultural production activities in a given year.

Problems of Agricultural Economics – a quarterly journal, the subject matter of which concerns agricultural economics and food economy.

A list of the IAFE's publications is available on: www.ierigz.waw.pl/publikacje.

In 2015 in the series of monographs of the Multiannual Programme was published following titles:

- Bodył M., Łopaciuk W., Rosiak E., Szajner P.: Sytuacja na światowym rynku zbóż, roślin oleistych, cukru i biopaliw oraz jej wpływ na krajowe rynki produktów roślinnych i możliwości ich rozwoju, seria „Monografie Programu Wieloletniego” nr 1, IERiGŻ-PIB, Warszawa, 2015.
